

Q

Isn't a free online form good enough for a web survey these days?

A

My Business Services' Web-Based Survey System for Research and Studies

With **YouVo** ユーヴォ

**1 Robust security that complies with research ethics**

- We protect personal information through dedicated server management and encrypted communication within Japan
- Submit the explanatory document to be included in the ethics review application
- Reward distributions are also conducted while maintaining anonymity

**2 User-friendly design**

- An easy-to-read screen layout (customizable) that cannot be achieved with standard forms
- Answer quickly without getting confused by conditional branching or skipping
- An anonymous feature that allows participants to pause and resume their participation easily

**3 Efficiently Collect and Utilize High-Quality Data**

- Prevent duplication and fraud; verify that each person submits only one response; check for missing data and inconsistencies
- Reliable data, output formats ready for immediate analysis
- Stable operation even for nationwide surveys involving tens of thousands of cases
